eDoctor Device

LoRaWAN® Device for Respiratory Illness Detection and Management

The TEKTELIC eDoctor Device is the ideal solution to monitor patients and vulnerable individuals for potential respiratory illness. This specialized device is designed to continuously monitor and detect the most common symptoms of respiratory illness including increased body temperature and breathing rate, persistent cough and accelerated heart rate.

- Hospitals & Medical Facilities
- Home Care Monitoring
- Athletic Performance Monitoring
- Healthcare Research
- Remote Vital Monitoring
- Senior Care Facilities

Sensing Functions

» Body Temperature

» Respiration (Breathing) Rate

» Chest Expansion

» Cough/Sneeze Detection

» Body Position

» Heart Rate

» Panic Push Button

Key Features

» Fully Integrated Desktop Application

» Adjustable, Washable Strap

» Low Battery Indicator (LED)

» Self-Calibration for Chest Expansion

» Long Range Wireless Connecivity

Technical and Functional System Specifications

General System Parameters

Operational Temperature	0°C to 50°C
Intended Operational Temperature*	32°C to 42°C
Body Temperature Accruacy	0.05°C from 35°to 40°C
Ingress Protection	IP30
Device Size	66.0 x 36.2 x 11.7 mm
Strap Size	For Chest Sizes 80cm to 140cm
Battery	CR2477
Estimated Battery Life	3 months

*Device will enter a Low-Power Sleep Mode outside this range
