## Milesight Field Tester

Milesight

Featuring LoRaWAN®

## FT101

Milesight Field Tester is a portable LoRaWAN<sup>®</sup> network testing device. With different kinds of antenna, it can support global LoRaWAN<sup>®</sup> frequencies to record the signal status and packet loss rate to monitor the network status from field and verify the coverage of different LoRaWAN<sup>®</sup> gateways, in order to optimize the best places to deploy LoRaWAN<sup>®</sup> network devices.

Equipped with a 5.72-inch touchscreen display, users are able to operate the signal test procedure and monitor the real-time network status friendly. With a built-in battery and type-C port, it can work for 8 hours and support type-C power bank charge to bring the device everywhere easily.
